The answer to all of your questions: **The MicorMIG.**

- Quick and simple operation
- Simple setting thanks to pre-defined synergic welding programmes
- Robust, dynamically controlled arc
- Simple and cost-efficient entrance into pulse welding
- MIG-MAG, TIG and electrode – all methods included
- Suitable for all common materials: Steel, stainless steel, aluminium
- Always with the perfect welding processes for the application
- Future-proof: Processes can be upgraded as required
- Simple job memory and transfer by NFC to other MicorMIG-systems

+ MicorMIG together with the LMS Performance Torch – the torch for the future industry. Our dream team.

Maximum productivity

- Compact build
- Perfect current transmission
- Centring of the wire
- Easy work even in difficult positions

Perfect ergonomics

- Perfectly balanced, slim and ergonomic
- Great grip
- High flexibility of the multiple ball joint

Excellent performance

- Optimum design for pulse welding
- Extremely stable and reliable arc
- Innovative contact tip cooling
- Perfect gas coverage

Sustainable welding

- Reduced wear
- Lower shielding gas consumption
- Repair-compatible design

Compact power sources
MicorMIG 400 | MicorMIG 500

Separate wire feeder systems
MicorMIG 400 | MicorMIG 500

Separate wire feeder systems optionally with MF-08 or MF-10 – the light, flexible, and robust wire feeders.

With intermediate hose packages for separate wire feeder systems in the available lengths: 5 m or 10 m.

Expand the functions and get even more from your system with the NFC upgrade to match:

NFC upgrade	Suitable for:
<p>NFC card "Full Process Synergic"</p> <p>Full Process Synergic includes the following welding processes and Synergic lines: Multi-Material, MIG brazing, SpeedArc, SpeedUp, Electrode Plus, TIG with ContacTIG, NFC Job read, and NFC Job write (NFC Job write only for ControlPro versions)</p>	all MicorMIG systems from 2018 onwards
<p>NFC upgrade – "Pulse Steel"</p> <p>Pulse arc for virtually spatter free welding of steel materials (by avoidance of the transition arc)</p>	all MicorMIG systems from 2018 onwards; only synergic systems BasicPlus, ControlPro
<p>NFC upgrade "Full Process Pulse"</p> <p>Full Process Pulse includes the following welding processes and Synergic lines: Pulse Multi-Material, MIG brazing, SpeedArc, SpeedUp, Electrode Plus, TIG with ContacTIG, MicorTwin, NFC Job read, and NFC Job write (NFC Job write only for ControlPro versions)</p>	all MicorMIG systems from 2018 onwards
